

The Association for Play Therapy, Inc. urges the FCC to HALT implementation of its proposed changes to the Telephone Consumer Protection Act of 1991 that require associations to fax "commercial materials" only to those members whose expressed consent we have first obtained. With a staff of four persons and knowing human nature, the odds of collecting such permission from 4,500 members scattered throughout the US is nearly impossible and unreasonable. Surely faxed spam can be controlled via mailing lists rather than impose such hardships on us. Please HALT these onerous and burdensome changes!
